This is a valuable tool for me, as an over the road truck driver, it is very important that I can get up to date weather and road conditions with out having to try to find a local radio station in the area that I am, and I can tell you that that is a great hassel from time to time, this helps me plan an alternate route if needed and saves time and fuel that would be wasted if I were sitting in a traffic tie up due to an accident or bad weather, PLEASE do not take this tool from me, there are many others out there like me that use this feature as I'm sure that you have already heard from.
